

# The Ohio River. A real logistics solution right now.

The Ports of Cincinnati & Northern Kentucky moves more freight than any other inland port in the United States. And we're just getting started.

The Ports of  
Cincinnati &  
Northern Kentucky

# COST EFFECTIVE. EFFICIENT. SUSTAINABLE.

## THE PORTS OF CINCINNATI & NORTHERN KENTUCKY

With regional knowledge and rich history of water transportation, it is no surprise the Ports of Cincinnati and Northern Kentucky is rated the top inland water port district in the United States. From grains to rolled steel, our region's transportation providers are equipped to handle your products efficiently and deliver them to your facility when you need them. Water transportation is the safest, most environmentally friendly, energy efficient, and cost-effective means of transport for your bulk shipments of goods.

“ For small shippers, the river offers a **lower-cost alternative** to trucking on our nation's increasingly congested highways.

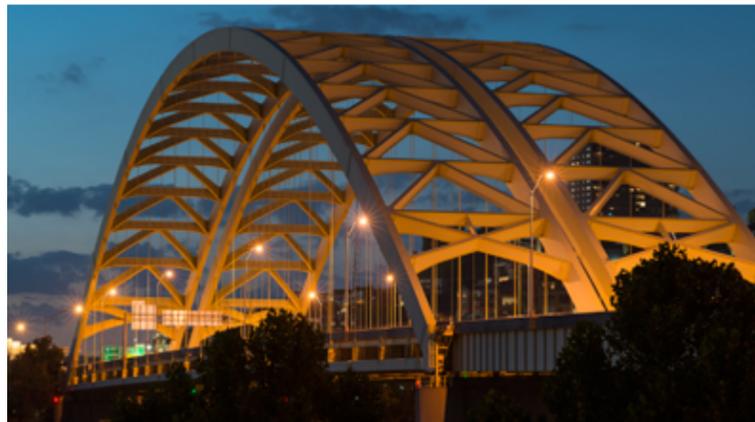

When we invest in trade on our rivers, our nation wins — in costs, traffic safety, economic growth, and job-creation.

Companies like ours **need the river to be at their best.**”

**Jeff Zalla**  
Co-Founder  
Alchemy Mineral LLC

“ The Ohio River is a major part of our business at Nucor Steel Gallatin. We utilize the river system to transport **over 1.6 million tons of scrap metal** and finished steel goods each year for our manufacturing process. To be a competitive business partner for our customers, and at the same time **stewards of the environment**, our river freight program works well for our mission AND, we get to interact with some great people along the way.”

**Tony Nath**  
Material Handling and Shipping Day Supervisor  
Nucor Steel Gallatin

## The Ports of Cincinnati & Northern KY.

**226**  
miles of  
marine highway

**144**  
docks  
and terminals

**43M**  
annual tons  
of cargo

**6**  
power plants  
751MW capacity

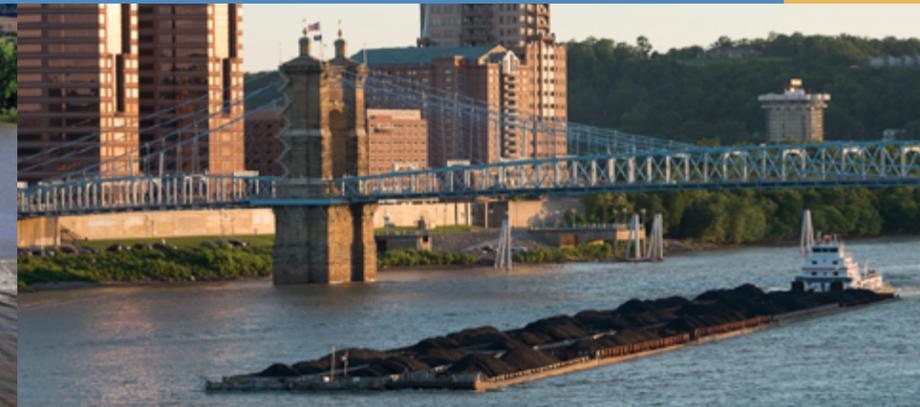

**4.1x**  
more fuel  
efficient  
than trucks

**10.5x**  
cleaner CO2  
emissions  
than trucks

- Feeding power plants that energize our economy
- Providing fuels at the pump for local commuters
- Helping Ohio, Kentucky and Indiana farmers feed the world
- Supplying raw materials for construction, manufacturing, and agriculture
- Connecting to the global economy via the Gulf of Mexico
- Situated along the U.S. Marine Highway M-70, which has significant excess capacity to alleviate congestion in our nation's highway and rail freight systems
